

Product Description

12V/24V/48V starter battery are widely used in various EVs due to its smaller and safer property. Wide range of battery capacity 16 to 192Ah can also be provided.

Specifications

Item		Parameters
Cell	Model	GSF46160P-16
Battery Pack	Pack Configuration	4P4S
	Rated voltage	12V
	Rated capacity	64Ah
	Work current	250A
	Pulse current	400A
	Dimensions (L*W*H)	420*270*120mm

Characteristic

- Humanity product design
- Strong technology and developing power
- Strict quality control
- Able to meet various strict requirements of customers with long life cycles/super-large capacity/low inner-resistant and high-rate discharge ability
- Safety: nice in electrical and stable performance
- Constant discharge current range:300 to 500A
- Allow customization
