

Product Description

Godsend's 12V/24V battery delivers outstanding power combining with advantage of long cycle life for replacing conventional lead-acid battery. It accepts high rates of charge and discharge, and PCM or BMS can be provided to prevent unexpected failures.

Specifications

Item		Parameters
Cell	Model	GSNCM46160M-25
Battery Pack	Pack Configuration	2P6S
	Rated voltage	21.6V
	Rated capacity	50Ah
	Work current	50A
	Dimensions (L*W*H)	270*230*170mm

Characteristic

- Strong charging acceptance and quick-charging capability
- Deep cycle performance with guaranteed long life span
- Light weight and higher energy density
- Allow customization
