Product Description

Traditionally, backup power is supplied by lead-acid batteries or diesel generators. In telecommunication power field, the backup power prompts higher requirements. LFP lithium battery system is mainly used for the backup battery of telecommunication industry and UPS.

Specifications

Item	Parameters
Model	GS-4U-48V 50Ah
Battery capacity	50Ah
Rated voltage	51.2V
Rated energy	2.56KWh
Communication interface	RS232 and RS485
Weight	29Kg
Dimensions(L*W*H)	425*178*350mm

Characteristic

- Ø Flexible configuration, high scalability to expand for longer backup time
- Ø Good electromagnetic compatibility
- Ø RS232 uplink and RS485 cascade ensuring good communication between battery system and the host
- Ø Applied in telecommunication stations, UPS and other filed of storage
- Ø LFP battery used for good safety and reliability with long life span
